Jeneane,

The shipment of filter and sediment sampling materials was sent today, for arrival to you on Thursday, January 17. The sampling instructions were not included in the shipment as we were putting the finishing touches on them. We will email you the instructions Thursday. Please feel free to call me with questions.

Regards,

Douglas Turner

That will work just fine. I'll see if our State Health Lab will let me store it in their -80 freezer over the weekend.

Hi Jeanene,

Thank you for returning my call yesterday. It was worth a try to ask about moving the sampling date, but fully

understand that you have a limited window due to the tank being drained for maintenance/repair.

On that note, I talked with our genetics expert, and he said that it was ok if the filter samples were shipped overnight on Monday if they are stored in a freezer over the weekend. A normal freezer would be fine (-10°C) and a lab freezer (-80°C) would be better (but harder to find). Getting them frozen ASAP is the main goal.

As far as a vacuum pump, I will include one in the filter sampling kit to be sent Wednesday (for arrival to you Thursday).

Please let me know if you have questions, etc.

Regards,

Douglas Turner

Subject: RE: Circle K Sampling - 2815 University Ave., Mesa AZ

Hello All,

What Jack and I discussed is that Battelle will ship the filters, supplies to filter, and instruction for the filtering to the address you tell us. Jeanene will filter the samples on site (returning the filtrate to the bulk fuel) and ship just the filters overnight to Battelle. We will store the filters in the deep freezer until a decision is made for them. This avoids the safety issues of shipping the liquid sample. Shipping filters does not have DOT restrictions and allows for the samples to be in stored within 24 hours of sampling.

What is the specific shipping address that should be used? Doug Turner is the point of contact coordinating this activity and cced on this message, keep us both on the email traffic. I also want to mention that he will set up pre-paid shipping labels for the return of the filtered samples.

If there are any questions, feel free to contact me.

Thanks everyone!!

Anne

John,

I spoke with Anne of Battelle. She suggested that, in addition to sampling kits sent by EPA ORD, Battelle can send the large bottle(s) to Jeanene and ask Jeanene to filter the samples on site. Jeanene can then ship the filtered samples to Battelle for storage.

Anne: Please elaborate your approach to the group and make necessary coordination. Hope it works. Thanks. Jack

Dear All:

DOT has rigid regulations on the shipment of flammable liquids.

Jeanene, you can ship us liter or gallon samples of water bottoms for Battelle, but do not ship fuel samples in any manner other than is described in the instructions that are included in the sampling kit that Cherri will send you.

Cherri: Include three or four of the 1 liter flasks with a orange screw cap. Label each flask "water only, no fuel". The flasks should not have preservative.

Thanks,

JOHN

 Jack Hwang---01/10/2013 11:23:01 AM---Hello All: Thank you Eric for your willingness to partner with EPA/Azdeq for such field studies.

Subject: Circle K Sampling - 2815 University Ave., Mesa AZ

Hello All:

Thank you Eric for your willingness to partner with EPA/Azdeq for such field studies.

The sampling activities scheduled for 1/18/2013 will be very much similar to the one we did at Circle K Store 8654 back in November 2012.

Thank you all we can pull together with such a short notice this time.

My main purpose for this email is to provide you with contact info so that you can begin the necessary preparation and coordination.

Sampling kits and shipping container

- John, Cherri: please call or write to Jeanene. I know Jeanene still has some sampling device you shipped to her some months ago. ORD may need her shipping street address, additional sample vials, etc.
- If possible, Battelle likes to have additional large-volume (one gallon or at least one liter per tank) of liquid samples for potential future microbial forensic analysis.
- Jeanene will take liquid samples from the three tanks and ship samples to ORD
- Please keep me and Randall Matas in the loop in your email correspondence.

Tank material samples

- Eric will cut portion of the tank top material
- Eric will hand these samples to Jeanene on site
- Jeanene will ship these samples to ORD

Contact Information

- Jeanene: please call Eric for the exact field schedule and/or last minute change
- contact info
